## Stories of Healing

Another Story of Healing Autism

**By Robert Bliss Vance, D.O., H.M.D.**

“Jamie, my grandson, had a serious problem. I noticed in him some classical signs of autism-abnormal behavior, no eye contact, no language. After forty years of active practice in alternative medicine, I was hoping and praying for a miracle...Jamie showed much improvement from many therapies including DMSA, the use of Metal-Free, and work with Dr. Max Collins diode. Dr. Collins worked with Jamie to detoxify the mercury from his body. Today Jamie is a pleasant, attentive, athletic, focused, and smiling seven-year-old.”
